

# 2017 BECKMAN SCHOLARS LECTURE

## *Gene silencing therapy for neurodegenerative disease*

DR. DON CLEVELAND

Wednesday, April 12, 2017

11:00am

Biological Sciences West #208

Dr. Cleveland received his Ph.D. in Biochemical Sciences at Princeton University. He was a faculty member at Johns Hopkins University for fourteen years before moving across the country to UC San Diego, where he currently serves as a chair of the Department of Cellular and Molecular Medicine, as well as head of the Laboratories of Cell Biology and ALS Research. Come hear him discuss his work regarding the use of a cutting-edge gene silencing therapy to treat neurodegenerative disease.
